

Biology

Advanced Level

Exam Board: AQA

Entry Requirements:

The course is well suited to those who gain a grade B/6 or above in GCSE Additional Science or in GCSE Biology, Chemistry or Physics. A B/6 grade in Maths is desirable.

“Students who study Biology like to know how things work, their own body, a cell process, or a complex ecosystem. They learn about when things go wrong - for example, diseases or environmental problems, and they enjoy making links and solving problems.

This course teaches the essential principles of Biology in interesting contexts. The course is exciting, relevant and challenging. It is designed to allow students to develop knowledge, understanding and the skills needed to continue studying in biological subjects beyond A level. The course seeks to highlight the contribution of Biology to modern society.

Biology: A-level subject content

First year of A-level

1. Biological molecules
2. Cells
3. Organisms exchange substances with their environment
4. Genetic information, variation and relationships between organisms

Second year of A-level

5. Energy transfers in and between organisms
6. Organisms respond to changes in their internal and external environments
7. Genetics, populations, evolution and ecosystems
8. The control of gene expression

Practical

Students will do at least 12 practical activities across the two year A-level. Students will have more opportunities to learn and use practical skills to link theory with practice, deepening their knowledge and understanding.

You can see the detailed subject content in A-level specifications at: aqa.org.uk/biology-guide

A level — all unit tests have to be taken in year 13.

Careers: The subject opens up a wide range of courses in medicine, biomedical sciences, vet science, microbiology, ecological survey work, physiotherapy.
