

Assessing scenes and identifying risks

The scene:

- Dangers:
- Making an area safe:
- Consent:
- Seeking support

Emergency services:

- What information needs to be given: location, what has happened, number of casualties, state of casualties, injuries.

Apply basic first aid procedures

Demonstrations of each procedure, showing:

- Effective assessment of scene
- Contacting of emergency services
- Step by step procedure of how to deal with injury
- Effective communication (verbal & non verbal)

R031: How can we contribute to everyday first aid?

First aid procedures for a range of injuries

Range of injuries:

- Conscious/unconscious and breathing/not breathing
- Choking
- An Asthma Attack
- Burns Or Scald
- Bleeding
- Shock

First aid procedures for a range of injuries: cause and symptoms

- Possible causes
- If the casualty is conscious or not
- Severity, if the casualty is breathing or not
- Symptoms
- The correct sequence of steps
- The rationale
